

Frontend Development Internship - 20 Exercise Challenge

DEADLINE: Submit all project files as a .zip via WhatsApp before Tuesday the 15th at 8:00 AM

Complete all 20 exercises below to demonstrate your HTML and CSS skills. Each exercise focuses on different concepts you've learned so far. Use only HTML tags you've learned: headings (h1-h6), paragraphs (p), links (a), buttons (button), spans (span), and inline semantics (strong, em). Focus on typography, colors, background-color, box-model concepts, and styling.

Special Note: Exercise 12 requires external CSS - you must create a separate .css file and link it to your HTML. This is the ONLY exercise that uses external CSS!

Exercise 1: Basic Student Profile Page

This exercise is for you to build your skills in creating a simple profile layout using headings and paragraphs. Practice typography hierarchy and dark mode styling.

Colors & Typography Reference

Student Name	rgb(231, 233, 234) 28px 800 weight
Major	rgb(113, 118, 123) 18px normal
Bio Text	rgb(231, 233, 234) 15px normal

Build this:

Alex Rodriguez

Computer Science Major

I'm a passionate computer science student who loves solving problems through code. I enjoy learning new technologies and building projects that can make a positive impact on people's lives. My goal is to become a full-stack developer and contribute to innovative software solutions.

Exercise 2: Page Titles & Subheadings

This exercise is for you to build your skills in typography hierarchy. Practice using different heading levels with distinct font sizes and colors to create visual hierarchy.

Colors & Typography Reference

Main Title	rgb(231, 233, 234) 24px 800 weight
Sub Title 1	rgb(29, 155, 240) 20px 700 weight
Sub Title 2	rgb(249, 24, 128) 16px 600 weight

Build this:

Welcome to My Portfolio

About My Journey

Skills & Projects

Exercise 3: Motivational Paragraph

This exercise is for you to build your skills in text styling. Practice using font-weight, font-size, and line-height to create engaging and readable content.

Colors & Typography Reference

Motivation Text	rgb(231, 233, 234) 17px 500 weight 1.6 line-height
-----------------	--

Build this:

Technology has the power to transform lives and solve complex problems. Every line of code I write brings me closer to creating solutions that matter. I believe in continuous learning, collaboration, and using technology as a force for good in our world.

Exercise 4: Nesting Challenge

This exercise is for you to build your skills in HTML nesting. Practice combining multiple inline elements (strong, em, a) within a paragraph to create rich text content.

Colors & Typography Reference

Base Text	rgb(231, 233, 234) 15px normal
Links	rgb(29, 155, 240) underline on hover

Build this:

Learning web development requires **dedication** and **creativity**, but the journey becomes easier when you have great resources like [MDN Web Docs](#) to guide you.

Exercise 5: Color Palette Preview

This exercise is for you to build your skills in color theory and theming. Practice creating different color combinations for text and backgrounds to simulate theme options.

🎨 Colors & Typography Reference		
Dark Theme	bg: rgb(22, 24, 28) text: rgb(231, 233, 234)	
Blue Theme	bg: rgb(29, 155, 240) text: rgb(255, 255, 255)	
Accent Theme	bg: rgb(249, 24, 128) text: rgb(255, 255, 255)	

Build this:

Dark Theme: Perfect for late-night coding sessions and reducing eye strain

Blue Theme: Professional and modern, great for business applications

Accent Theme: Bold and energetic, perfect for call-to-action elements

Exercise 6: Button Library

This exercise is for you to build your skills in recreating real-world UI elements. Practice copying the exact styling of buttons from popular apps and platforms.

🎨 Colors & Typography Reference		
Twitter	bg: rgb(29, 155, 240) text: rgb(255, 255, 255) 20px radius	
Facebook	bg: rgb(24, 119, 242) text: rgb(255, 255, 255) 6px radius	
YouTube	bg: rgb(255, 0, 0) text: rgb(255, 255, 255) 2px radius	
Instagram	gradient background text: rgb(255, 255, 255) 8px radius	

Build this:

Tweet Connect on Facebook Subscribe Follow

Play on Spotify View on GIt-Hub Connect

Join Server Message Follow on TikTok Add to Cart

Watch Now Open in Slack Join Meeting

Continue with Apple Sign in with Google

Sign in with Microsoft Request Ride Book Now

Save Pin

Exercise 7: Notification Banner

This exercise is for you to build your skills in creating interactive UI components. Practice positioning elements and creating hover effects for better user experience.

🎨 Colors & Typography Reference		
Banner Background	bg: rgb(29, 155, 240) text: rgb(255, 255, 255)	
Close Button	transparent bg white text absolute position	

Build this:

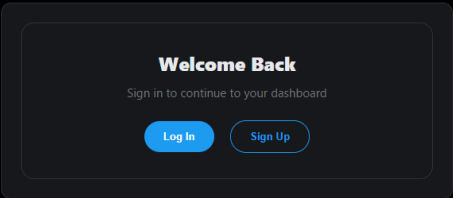

👋 Welcome! Your account has been successfully created. Start exploring our features now! ✕

Exercise 8: Fake App Panel

This exercise is for you to build your skills in creating app-like interfaces. Practice centering content and styling buttons to look professional and modern.

🎨 Colors & Typography Reference		
Panel Background	bg: rgb(22, 24, 28) border: rgb(47, 51, 54)	
Title	rgb(231, 233, 234) 24px 800 weight	
Login Button	bg: rgb(29, 155, 240) text: rgb(255, 255, 255)	
Signup Button	transparent bg border: rgb(29, 155, 240)	

Build this:

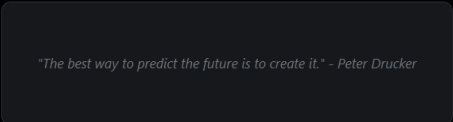

Exercise 9: Text Alignment

This exercise is for you to build your skills in text alignment and hover effects. Practice centering text and creating smooth color transitions.

Colors & Typography Reference	
Quote Text	rgb(113, 118, 123) 17px italic center aligned
Hover State	rgb(29, 155, 240) 0.2s transition

Build this:

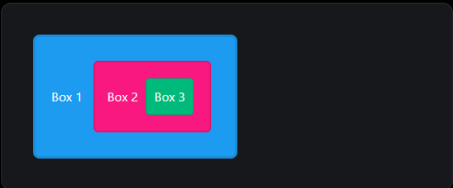

Exercise 10: Nested Box-Model Puzzle

This exercise is for you to build your skills in understanding the CSS box model. Practice using padding, margin, and borders with nested elements.

Colors & Typography Reference	
Box 1	bg: rgb(29, 155, 240) border: 3px padding: 20px
Box 2	bg: rgb(249, 24, 128) border: 2px padding: 15px
Box 3	bg: rgb(0, 186, 124) border: 1px padding: 10px

Build this:

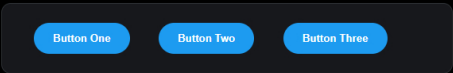

Exercise 11: Spacing Sequence

This exercise is for you to build your skills in element spacing. Practice using margin to create even spacing between buttons in a row.

Colors & Typography Reference	
Button Style	bg: rgb(29, 155, 240) text: rgb(255, 255, 255)
Spacing	margin: 0 16px padding: 12px 24px

Build this:

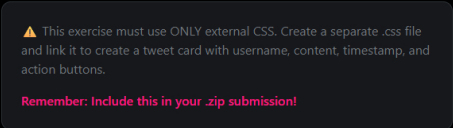

Exercise 12: Fake Tweet Card

This exercise is for you to build your skills in external CSS linking. Practice creating a separate CSS file and linking it to HTML to style a social media card.

Colors & Typography Reference	
Tweet Background	bg: rgb(22, 24, 28) border: rgb(47, 51, 84)
Username	rgb(231, 233, 234) 17px 700 weight
Content	rgb(231, 233, 234) 15px normal
Timestamp	rgb(113, 118, 123) 15px normal

Build this:

Exercise 13: App Header Banner

This exercise is for you to build your skills in creating app headers. Practice combining large and small headings with proper color contrast and spacing.

📌 Colors & Typography Reference	
Main Header	rgb(231, 233, 234) 32px 800 weight
Sub Header	rgb(113, 118, 123) 17px 400 weight

Build this:

CodeMaster Pro

Your journey to becoming a developer starts here

Exercise 14: Paragraph Contrast

This exercise is for you to build your skills in color contrast and accessibility. Practice creating light and dark theme variations side by side.

📌 Colors & Typography Reference	
Light Mode	bg: rgb(255, 255, 255) text: rgb(15, 20, 25)
Dark Mode	bg: rgb(22, 24, 28) text: rgb(231, 233, 234)
Layout	inline-block 48% width 12px border-radius

Build this:

Light Mode: Traditional design with dark text on light background. Easy to read in bright environments and familiar to most users.

Dark Mode: Modern approach with light text on dark background. Reduces eye strain and saves battery on OLED screens.

Exercise 15: Profile Title Card

This exercise is for you to build your skills in creating card-based layouts. Practice using borders, backgrounds, and centered content to create professional profile cards.

📌 Colors & Typography Reference	
Card Background	bg: rgb(22, 24, 28) border: rgb(47, 51, 54)
Name	rgb(231, 233, 234) 20px 800 weight
Role	rgb(113, 118, 123) 15px normal

Build this:

Sarah Chen

Frontend Developer & UI Designer

Exercise 16: WhatsApp-Style Chat Bubbles

This exercise is for you to build your skills in creating chat interfaces. Practice using float or inline-block to position messages left and right with different styling.

📌 Colors & Typography Reference	
Sent Messages	bg: rgb(29, 155, 240) text: rgb(255, 255, 255) float: right
Received Messages	bg: rgb(47, 51, 54) text: rgb(231, 233, 234) float: left
Border Radius	18px padding: 12px 16px max-width: 70%

Build this:

Hey! How's your coding project going?

Going great! Just finished the CSS styling 🚀

That's awesome! Can't wait to see it

Thanks! I'll show you tomorrow

Exercise 17: Button Stack Challenge

This exercise is for you to build your skills in progressive styling. Practice creating visual progression by increasing border thickness and padding across multiple buttons.

🎨 Colors & Typography Reference		
All Buttons	bg: rgb(29, 155, 240) text: rgb(255, 255, 255)	
Border Progression	1px → 2px → 3px → 4px → 5px	
Padding Progression	8px → 10px → 12px → 14px → 16px	

Build this:

Level 1 - Thin Border

Level 2 - Medium Border

Level 3 - Thick Border

Level 4 - Thicker Border

Level 5 - Thickest Border

Exercise 18: Mini Announcement Panel

This exercise is for you to build your skills in creating alert components. Practice positioning close buttons and creating attention-grabbing announcement styles.

🎨 Colors & Typography Reference		
Announcement	bg: rgb(249, 24, 128) text: rgb(255, 255, 255)	
Close Button	border: 1px white border-radius: 50% 24px × 24px	
Position	absolute right: 16px top: 50%	

Build this:

 System Maintenance: Scheduled downtime tonight from 2-4 AM

Exercise 19: Typography Showcase

This exercise is for you to build your skills in comprehensive typography. Practice using all text formatting elements including headings, links, bold, italic, code, and various text sizes.

🎨 Colors & Typography Reference		
Headings (h3)	rgb(29, 155, 240) 20px 700 weight	
Body Text	rgb(231, 233, 234) 15px 1.6 line-height	
Links	rgb(29, 155, 240) underline on hover	
Emphasis (em)	rgb(249, 24, 128) italic	
Code	bg: rgb(47, 51, 54) text: rgb(29, 155, 240)	
Highlight	bg: rgb(249, 24, 128) text: rgb(255, 255, 255)	
Small Text	rgb(113, 118, 123) 13px	
Large Text	rgb(231, 233, 234) 18px 600 weight	

Build this:

Welcome to the Typography Showcase

This comprehensive example demonstrates **various text formatting techniques** that every frontend developer should master. Typography is *the foundation of great web design* and plays a crucial role in user experience.

When working with text, you'll often need to **emphasize important information**, create *subtle emphasis with italics*, or even **highlight critical content** to draw attention. Modern web development also requires understanding of `inline code formatting` for technical documentation.

Essential Typography Skills

Professional developers must understand how to create **meaningful links** that provide clear navigation paths. You'll also work with smaller supporting text for captions and footnotes, as well as **larger text for emphasis** when needed. Remember that **accessibility is paramount** - your text must be *readable and meaningful* to all users. This includes proper contrast ratios, logical heading hierarchy, and *descriptive link text* that makes sense out of context.

Advanced Formatting Techniques

In real-world projects, you'll combine multiple formatting techniques: **bold italic text**, `code snippets with bold elements`, and even **bold links** for maximum impact. The key is **knowing when and how to use each technique appropriately**.

Note: This exercise teaches you to work with complex nested formatting, preparing you for real-world content management and documentation tasks.

Exercise 20: Mini Profile Showcase

This exercise is for you to build your skills in combining all learned concepts. Practice creating a complete profile section using headings, paragraphs, buttons, and links with professional styling.

🔗 Colors & Typography Reference	
Profile Header	rgb(231, 233, 234) 28px 800 weight
Motivation Text	rgb(231, 233, 234) 17px 1.5 line-height
Primary Button	bg: rgb(29, 155, 240) text: rgb(255, 255, 255)
Secondary Button	transparent bg border: rgb(29, 155, 240)
Accent Button	bg: rgb(249, 24, 128) text: rgb(255, 255, 255)
Links	rgb(29, 155, 240) 500 weight underline on hover

Build this:

Maria Santos

Passionate about creating beautiful, functional web experiences that delight users and solve real-world problems. Always learning, always growing.
